## CERTIFICATES

Full-Stack Engineer | **150 Hours**

Data & Programming

Foundations for AI | **39 Hours**

Python 3 | **24 Hours**

Building AI Agents

Generative AI

Machine Learning Specialist (in

progress) | **95 Hours**

## SKILLS

Full-Stack Development

PERN | JavaScript

Python | HTML5 | CSS

JSX | React | Redux

TailwindCSS | Vite

Node.js | Express.js

OAuth | Web Security

RESTful API Development

PostgreSQL | SQL

Netlify | Render

Git/Github | Pandas

Data Wrangling &

Analysis | Seaborn

Statistics | Statistical

Modeling | Linear

Algebra | Probability

Agentic AI | AI/ML

## SUMMARY

Junior Software Developer with a strong foundation in full-stack engineering, data, and applied AI. Completed a 150-hour Full-Stack Engineering certification, along with certifications in Data & Programming Foundations for AI, Python 3, Building AI Agents, and Generative AI, and currently completing an additional 95-hour Data Scientist: Machine Learning Specialist certification. Skilled in JavaScript, Python, React, Redux, the PERN stack, SQL/PostgreSQL, RESTful APIs, OAuth, and modern development workflows, with experience in data analysis using Pandas and foundational knowledge in machine learning concepts.

## PROJECTS

### Happy Hour Swipe App | [happy-hour-api-561p.onrender.com/login](https://happy-hour-api-561p.onrender.com/login)

*Full-Stack Local Happy-Hour Discovery Platform*

- **Tech Stack:** PERN, RESTful APIs, JWT auth, Render.
- Built a full-stack swipe-style interface where authenticated users browse, filter, and “save” local happy hours to a personalized weekly calendar.
- Designed and implemented relational schemas for users, restaurants, happy hours, and user interests, with secure auth, protected routes, and validation.
- Deployed production-ready client and server to Render, handling environment config, database connectivity, and basic monitoring/logging.

### Personal Portfolio Website | [maxgemereth.live](https://maxgemereth.live)

*Front-End Portfolio Website*

- **Tech stack:** React (Vite), React Router, TailwindCSS, JavaScript, HTML5
- Designed and built a frontend portfolio website to showcase technical skills, professional background, projects, and resume for entry-level tech roles.
- Implemented a modular React frontend with reusable components and responsive layouts using TailwindCSS, following modern development best practices.
- Includes client-side routing with React Router v7, custom font integration, and interactive UI elements.

## EMPLOYMENT | REALTOR

*Century 21, Cumming, GA | 2021 – Present*

- Managed multiple concurrent client projects with strict timelines and regulatory compliance
- Regularly adapted to changes in market trends, legal procedures, and client behaviors- skills mirrored in tech with new tools and frameworks.
- Maintained meticulous attention to detail while crafting, negotiating, and upholding hundreds of legal contracts.
