Portfolio: maxgemereth.live

PROFESSIONAL SUMMARY

- Full Stack Java Developer at AVPS Technologies with hands-on experience building production-style web applications using Java, Spring Boot, Kafka, React, and modern database systems.
- Skilled in designing and developing RESTful APIs, event-driven microservices, and responsive user interfaces using JavaScript/JSX and Tailwind CSS. Experienced with PostgreSQL, MySQL, MongoDB, Docker, and modern software development workflows.
- Completed 325+ hours of technical certifications across full-stack engineering, AI, Python, and data science, with additional specialization in machine learning fundamentals.

TECHNICAL SKILLS

- Languages: Java, JavaScript, Python, SQL, HTML5, CSS
- Frameworks & Libraries: Spring Boot, React, Redux, Node.js, Express.js, TailwindCSS, Vite
- Databases: PostgreSQL, MySQL, MongoDB
- Tools & Platforms: Docker, Git/GitHub, Kafka, Render
- Concepts: REST APIs, Microservices, JWT Authentication, OAuth, Web Security, Event-Driven Architecture
- AI & Data: Pandas, Data Wrangling, Statistical Modeling, Linear Algebra, Probability, Agentic AI, AI/ML

WORK EXPERIENCE

AVPS Technologies Inc. — Oct 2025 – Present

Project: Krumago

Role: Full Stack Java Developer

Responsibilities

- Designed and developed backend microservices using Spring Boot to support scalable business operations and system integrations.
- Created asynchronous messaging workflows with Apache Kafka to enable reliable event-driven communication between services.

- Developed and enhanced RESTful APIs for frontend applications and external service integrations.
- Built interactive frontend modules using ReactJS and integrated them with backend APIs for seamless user experiences.
- Utilized Docker for containerization and supported application deployments across development and testing environments.
- Contributed to CI/CD implementation and deployment automation using Jenkins and Git-based version control practices.
- Worked in Agile development environments, actively participating in sprint planning, stand-ups, backlog discussions, and retrospectives.
- Collaborated with QA, DevOps, and business teams to resolve production issues, improve system stability, and optimize application performance.
- Wrote unit and integration test cases using JUnit to improve code quality and maintain application reliability.

Environment

Java, Spring Boot, Apache Kafka, RESTful Services, Microservices, Docker, Kubernetes, Jenkins, ReactJS, Node.js, Git, Maven, JUnit, Jest, DB2, Agile/Scrum, CI/CD, Visual Studio Code, JMeter, SOAP UI

PROJECTS

Personal Portfolio Website | maxgemereth.live

- Built a frontend portfolio website using React (Vite), React Router, TailwindCSS, JavaScript, and HTML5.
- Designed reusable React components and responsive layouts following modern frontend development practices.
- Implemented client-side routing, custom font integration, and interactive UI elements.

Happy Hour Swipe App | happy-hour-api-561p.onrender.com/login

- Developed a full-stack PERN application with RESTful APIs and JWT authentication.
- Built a swipe-style interface allowing users to browse, filter, and save local happy hours to a personalized calendar.
- Designed relational database schemas for users, restaurants, happy hours, and user interests.
- Deployed production-ready client and server applications to Render with environment configuration and logging.

CERTIFICATIONS

- Full-Stack Engineer – 150 Hours
- Foundations for AI – 39 Hours
- Python 3 – 24 Hours
- Spring & Java APIs – 20 Hours
- Building AI Agents
- Generative AI
- Machine Learning Specialist (In Progress) – 95 Hours
